

Doctoral Fellow · ETH AI Center, ETH Zürich

I currently develop reward learning methods that learn jointly from heterogeneous feedback, and use them for RL post-training of language models.

01 SELECTED PUBLICATIONS

Under review, 2026 Manuscript available on request	●	Learning from Everything: Dense Rewards from Every Kind of Feedback Emmy Zhou, Raphaël Baur , Thomas Kleine Buening, Mennatallah El-Assady, Giorgia Ramponi, Andreas Krause <i>Token-level reward models for LLMs (Llama 3.2 3B), learned jointly from five feedback types. Up to +19.8 points over sequence-level reward models on RewardBench. Under PPO on GSM8K: 44.1% vs. 41.5% accuracy, with less reward over-optimization.</i>
ICML 2026	●	MAVRL: Learning Reward Functions from Multiple Feedback Types with Amortized Variational Inference Raphaël Baur , Yannick Metz, Maria Gkoulta, Mennatallah El-Assady, Giorgia Ramponi, Thomas Kleine Buening
ICML 2026 Mechanistic Interpretability Workshop	●	Where Do Models Find Happiness? Emotion Vectors in Open-Source LLMs Sinie van der Ben, Raphaël Baur , Yannick Metz, Mennatallah El-Assady
ICLR 2025	●	Reward Learning from Multiple Feedback Types Yannick Metz, András Geiszl, Raphaël Baur , Mennatallah El-Assady
ICML 2023 Interactive Learning with Implicit Human Feedback Workshop	●	RLHF-Blender: A Configurable Interactive Interface for Learning from Diverse Human Feedback Yannick Metz, David Lindner, Raphaël Baur , Daniel Keim, Mennatallah El-Assady
eCAADe 2023	●	The DesignMind Toolkit: A Toolkit for Evidence-Based, Cognitively-Informed and Human-Centred Architectural Design Michal Gath-Morad, Raphaël Baur , Christoph Hölscher

02 EDUCATION

09/2024 – present Zurich, CH	○	Ph.D. in Computer Science ETH AI Center, ETH Zürich Thesis: Navigating the Complexity of Multi-Stakeholder Design through AI-driven Collaboration. Focus: reward learning from heterogeneous feedback, RLHF, LLM interpretability. Supervisor: Prof. Dr. Mennatallah El-Assady · Second advisor: Prof. Dr. Christoph Hölscher · AI Center Doctoral Fellowship (1% acceptance rate).
09/2021 – 07/2024 Zurich, CH	○	M.Sc. Computer Science: Machine Intelligence ETH Zürich Thesis: Human-Aligned, Bluetooth-Based Indoor Localization Using Sequential Monte Carlo.
09/2022 – 02/2023 Delft, NL	○	Master's Exchange, Computer Science TU Delft
09/2018 – 08/2021 Zurich, CH	○	B.Sc. Computer Science ETH Zürich Thesis: Learnability of Buildings: Using Reinforcement Learning to Predict the Ease of Wayfinding in Large, Multilevel Buildings.

03 TEACHING

2020 – present	○	Teaching Assistant ETH Zürich Evidence-Based Design for Architecture (851-0252-08L), 2020 – present · Linear Algebra (401-0131-00), 2020 – 2021.
----------------	---	---

04 HONORS & SERVICE

2025 – present	○	Fellow Representative, ETH AI Center Elected representative of the doctoral fellows to the Center's leadership.
01/2023	○	ETH Ambassador, Global Young Scientist Summit 2023, Singapore One of nine ETH representatives.
2018 – 2021	○	Member, Swiss Study Foundation

05 SKILLS & LANGUAGES

Skills	Python, PyTorch, JAX, Stable-Baselines3, Gymnasium/MuJoCo, Hugging Face Transformers, C#, TypeScript			
Languages	German Native	English C2	French C1	Italian B1
